SMARTPHONE MHL TO HDMI CONVERTER

Connects Android smartphone/tablet with MHL-interface to HDMI display

Features & Applications

The MHL to HDMI Converter sends video and audio from a smartphone/tablet with MHL (Mobile High-Definition Link) interface to an HDTV with HDMI input. The adapter connects to the phone's Micro-USB port at one end and to an HDMI cable (not included) at the other. A Micro-USB port on the side of the adapter allows the mobile device to charge simultaneously.

- Play smartphone or tablet with MHL interface on an HDTV.
- Supports HDTV resolutions up to 1080p.
- Supports embedded digital audio through HDMI compatible TVs or audio receivers.
- Provides power to mobile device via USB micro-B input port.
- Plug and play functionality – no new software or drivers required.

Connectors

- One male USB micro-B connector on attached 3.5” cable for connecting to smartphone/tablet.
- One female HDMI connector for HDMI output.
- One female USB micro-B connector for powering/charging mobile device.

Video

- Supports HDTV resolutions up to 1080p.

Power

- Powered by travel charger (included with mobile device) connected to the micro-USB port on the side of the adapter.

Dimensions

- WxDxH: 1.06x1.94x0.50 in. (27x49x13 mm)

Package Includes

- MHL to HDMI converter
- User manual
