

# 2-PORT HDMI SWITCH

Switch one HDMI display between two HDMI sources

SE-HD-2-LC

## Features & Applications

The 2-port HDMI video switch enables one HDMI display to be switched between two HDMI video sources. The switch can be controlled via the push button.

- Supports HDTV resolutions to 1080p and computer resolutions to 1920x1200 (WUXGA).
- Plug and play functionality - no new software or drivers required.
- Eliminates the need to disconnect and then reconnect multiple HDMI sources.
- Ideal solution for connecting multiple HD media devices such as video game consoles, media PCs, set top boxes, DVRs, DVD players, etc. to your home theater systems.
- HDMI features supported:
  - 12-bit Deep Color
  - LPCM, Dolby TrueHD, DTS-HD Master Audio, Dolby Digital, and DTS
  - Supports 250MHz/2.5Gbps per channel (7.5Gbps all channels) bandwidth.
  - 3D
- HDCP compliant
