## CAT5e Left Angle to Straight Shielded Patch Cord

**CAT5E-LAS-xx-GRAY-SHLD**

VPI's VPCAT™ Left Angle to Straight Shielded Category 5e patch cords are assembled with T568B four pair stranded cable, and are ideal for confined spaces. They feature a strain relief boot, preventing excessive bending while reducing stress on the cable.

- Used to connect your network card to a 10/100/1000Base-T hub or switch.
- When the tab on the plug is on the top, the cable will extend to the left.
- Patch cables and boots are the same color
- Boots are snagless.
- Left angle L plug configuration useful in tight fit situations.
- Patch cables have stranded copper conductors for flexibility - great for frequent changes that occur at the wall outlet or patch panel.

## CAT5e Left Angle to Left Angle Shielded Patch Cord

**CAT5E-LA-xx-GRAY-SHLD**

VPI's VPCAT™ Left Angle Shielded CAT5e patch cords are assembled with T568B four pair stranded cable, and are ideal for confined spaces. They feature a strain relief boot, preventing excessive bending while reducing stress on the cable.

- Use to connect your network card to a 10/100/1000Base-T hub or switch.
- When the tab on the plug is on the top, the cable will extend to the left.
- Patch cables and boots are the same color
- Boots are snagless.
- Left angle L plug configuration useful in tight fit situations.
- Patch cables have stranded copper conductors for flexibility - great for frequent changes that occur at the wall outlet or patch pane
- Available length: 2ft
- Color: Gray

## CAT5e Left Angle to Straight Shielded Patch Cord

**CAT5E-LAS-xxIN-GRAY-SHLD**

VPI's VPCAT™ Left Angle to Straight Shielded Category 5e patch cords are assembled with T568B four pair stranded cable, and are ideal for confined spaces. They feature a strain relief boot, preventing excessive bending while reducing stress on the cable.

- Used to connect your network card to a 10/100/1000Base-T hub or switch.
- When the tab on the plug is on the top, the cable will extend to the left.
- Patch cables and boots are the same color
- Boots are snagless.
- Left angle L plug configuration useful in tight fit situations.
- Patch cables have stranded copper conductors for flexibility - great for frequent changes that occur at the wall outlet or patch panel.
- Available lengths: 10 inches & 13 inches

## CAT5e Right Angle to Straight Shielded Patch Cord

**CAT5E-RAS-xx-GRAY-SHLD**

VPI's VPCAT™ Right Angle to Straight Shielded Category 5e patch cords are assembled with T568B four pair stranded cable, and are ideal for confined spaces. They feature a strain relief boot, preventing excessive bending while reducing stress on the cable.

- Use to connect your network card to a 10/100/1000Base-T hub or switch.
- When the tab on the plug is on the top, the cable will extend to the right.
- Patch cables and boots are the same color
- Boots are snagless.
- Right angle L plug configuration useful in tight fit situations.
- Patch cables have stranded copper conductors for flexibility - great for frequent changes that occur at the wall outlet or patch panel.

## CAT5e Right Angle to Straight Shielded Patch Cord, 2Ft.

**CAT5E-RASV2-2-GRAY-SHLD**

These VPI Right Angle to Straight Shielded Category 5e Patch Cords are assembled with T568B four pair stranded cable, and are ideal for confined spaces. They feature a strain relief boot, preventing excessive bending while reducing stress on the cable.

- Use to connect your network card to a 10/100/1000Base-T hub or switch.
- Use to connect your network card to a 10/100/1000Base-T hub or switch.
- When the tab on the plug is on the top, the cable will extend to the right.
- Patch cables and boots are the same color
- Boots are snagless.
- Right angle L plug configuration useful in tight fit situations.
- Patch cables have stranded copper conductors for flexibility – great for frequent changes that occur at the wall outlet or patch panel.

## CAT5e Right Angle to Right Angle Shielded Patch Cord

**CAT5E-RAV2-2-GRAY-SHLD**

VPI's VPCAT™ Right Angle Shielded Category 5e patch cords are assembled with T568B four pair stranded cable, and are ideal for confined spaces. They feature a strain relief boot, preventing excessive bending while reducing stress on the cable.

- Use to connect your network card to a 10/100/1000Base-T hub or switch.
- When the tab on the plug is on the top, the cable will extend to the right.
- Patch cables and boots are the same color
- Boots are snagless.
- Right angle L plug configuration useful in tight fit situations.
- Shell Nickel Plated
