

Super Flat CAT5e/6/7 Patch Cables

www.vpi.us/c/sf-patch-cables-205

CAT5e Super Flat Patch Cords - 28 AWG

- Use to connect your network card to any of the following:
 - 1000BASE-T Gigabit Ethernet
 - 100BASE-T Ethernet
 - 100BASE-TX Fast Ethernet
 - 10BASE-T Ethernet
- Patch cables have stranded copper conductors for flexibility - great for frequent changes that occur at the wall outlet or patch panel.
- Similar to flat satin or ribbon cable, but these cables have twisted pairs.

CAT5e Super Flat Patch Cords - 32 AWG

- Use to connect your network card to any of the following:
 - 1000BASE-T Gigabit Ethernet
 - 100BASE-T Ethernet
 - 100BASE-TX Fast Ethernet
 - 10BASE-T Ethernet
- Patch cables have stranded copper conductors for flexibility - great for frequent changes that occur at the wall outlet or patch panel.
- Similar to flat satin or ribbon cable, but these cables have twisted pairs.

CAT5e Super Flat Shielded Patch Cords

- Use to connect your network card to any of the following:
 - 1000BASE-T Gigabit Ethernet
 - 100BASE-T Ethernet
 - 100BASE-TX Fast Ethernet
 - 10BASE-T Ethernet
- Patch cables & molded strain relief are the same color.
- Patch cables have stranded copper conductors for flexibility - great for frequent changes that occur at the wall outlet or patch panel.
- Individually foil shielded twisted pairs and one drain wire protects signals from external noise..

CAT5e Industrial Super Flat Shielded Patch Cords

- Use to connect your network card to any of the following:
 - 1000BASE-T Gigabit Ethernet
 - 100BASE-T Ethernet
 - 100BASE-TX Fast Ethernet
 - 10BASE-T Ethernet
- Patch cables & molded strain relief are the same color.
- Patch cables have stranded copper conductors for flexibility - great for frequent changes that occur at the wall outlet or patch panel.
- Individually foil shielded twisted pairs and one drain wire protects signals from external noise.
- Industrial CAT5e cable - suitable for use at high temperatures up to 176°F (80°C).

Super Flat CAT5e/6/7 Patch Cables

www.vpi.us/c/sf-patch-cables-205

CAT6 Super Flat Patch Cords

CAT6-SF-xx-COLOR

- Use to connect your network card to any of the following:
 - 1000BASE-T Gigabit Ethernet
 - 100BASE-T Ethernet
 - 100BASE-TX Fast Ethernet
 - 10BASE-T Ethernet
- Patch cables have stranded copper conductors for flexibility - great for frequent changes that occur at the wall outlet or patch panel.
- Available with Standard boot or Snagless boot.
 - Available lengths with standard boot: 0.5/1/2/3/7/10/14/25/50 feet
 - Available lengths with snagless boot: 1/1.5/2/3/5/7/10/15/45 feet

CAT7 Super Flat Patch Cords

CAT7-SF-xx-COLOR

- Backwards compatible with CAT5, CAT5e, CAT6, and CAT6a equipment.
- Virtually eliminates alien crosstalk and interference.
- Consists of four individually shielded pairs.
- Stranded copper conductors for flexibility - great for frequent changes that occur at the wall outlet or patch panel.
- Similar to flat satin or ribbon cable, but these cables have twisted pairs.
- Patch cables and boots are the same color; boots are snagless.

CAT6 Super Flat 32 AWG Patch Cords

CAT6-SFV2-7-BLACK

- These flat CAT6 noodle cables are ideal for hiding under carpets.
- Used to connect your network card to any of the following:
 - 10GBASE-T Ethernet
 - 1000BASE-T Gigabit Ethernet
 - 100BASE-T Ethernet
 - 100BASE-TX Fast Ethernet
 - 10BASE-T Ethernet
- Patch cables & molded strain relief are the same color.
- Patch cables have stranded copper conductors for flexibility - great for frequent changes that occur at the wall outlet or patch panel.
