

CAT7 SUPER FLAT CABLE OR PATCH CORD

These Category 7 cables are only 0.08" thick and are ideal for hiding under carpets

CAT7-SF-xx-WHITE

Use Under Carpets

Cable Thickness = 0.08"

Features & Applications

The VPCAT™ CAT7 Super Flat Patch Cords fit in the tightest spaces, where regular CAT7 patch cord is too bulky. These flat, fully molded cables give a neat appearance to desktops and wall outlets, and are suitable for 10 Gigabit Ethernet applications.

- Backwards compatible with CAT5, CAT5e, CAT6, and CAT6a equipment.
- Virtually eliminates alien crosstalk and interference.
- Consists of four individually shielded pairs inside an overall braided shield.
- Stranded copper conductors for flexibility - great for frequent changes that occur at the wall outlet or patch panel.
- Similar to flat satin or ribbon cable, but these cables have twisted pairs.
- Patch cables and boots are the same color; boots are snagless.

Specifications

- Color: white
- Cable thickness: 0.08"
- Cable width: 0.24"
- 32AWG stranded CAT7 STP
- 8x8 (RJ45) plugs.
- 50 micron gold plated contacts
- Complies with TIA/EIA 568B standard
- Supports 10/100/1000/10G Base-T networks
- Available in 2, 5, 10, 14, 25, and 50 ft lengths.
